

Curriculum Vitae

Name: Tomotoshi Nishino

Mailing Address: Department of Physics, Graduate School of Science, Kobe University, Rokkodai 1-1, Nada, Kobe 657-8501, Japan

e-mail: nishino@phys.sci.kobe-u.ac.jp

Research and professional experience:

May 2002 - present: Associate Professor at Department of Physics, Graduate School of Science, Kobe University.

October 1996 - April 2002: Assistant Professor at Department of Physics, Faculty of Science, Kobe University.

April 1992 - September 1996: Research associate at Department of Physics, Faculty of Science, Tohoku University.

Education:

March 1992: Awarded a doctor of science at Osaka University for a thesis entitled "Electron Correlation Effects in Low Dimensional Periodic Systems".
Work supervised by Prof. J. Kanamori.

April 1989 - March 1992: Doctoral Program in Science, Osaka University.

April 1987 - March 1989: Master's Program in Science, Osaka University. Awarded a master of Science for a thesis entitled "Pairing Mechanism of Holes in High T_c Superconductors".
Work supervised by Prof. J. Kanamori.

April 1983 - March 1987: Department of Physics, Faculty of Science, Osaka University. Awarded a bachelor of Science.

Technical experience:

Investigated variational principle in the Density Matrix Renormalization Group (DMRG) method, and developed numerical algorithms, such as the Corner Transfer Matrix Renormalization Group (CTMRG) and the Tensor Product Variational Approach (TPVA), for the applications of DMRG to 2- and 3-dimensional classical systems. Also wrote original source codes for the Interaction Round a Face (IRF) DMRG method applied to 1-dimensional quantum spin chains.
